Dear Nissim, I love the sound of your work using NLP techniques to power search engines for text. There's a parallel with my own experience; I'm building and evaluating an NLP system as part of my computer science degree at Cambridge, applying part-of-speech stochastic tagging. Might we be able to have a chat about how I could get professional exposure to the work you're doing? I'm really interested to know more. Kind regards,*<x>*

Questions?

(before we look at optimising CVs...)

Agree or disagree: "5 seconds is not enough time for a recruiter to accurately judge my CV"

Agree or disagree: "A CV is a place to list all your achievements"

† Havendo S.re mio ill.mo visto et considerato horamai ad sufficientia le prove di tutti quelli che si
reputono maestri et compositori de instrumenti bellici : et che le inventione et operatione di dicti
instrumenti non sono niente alieni dal comune uso : mi sforzero non derogando a nessuno altro
farmi intendere da v. ex.tia aprendo a essa li secreti mei : et appresso offerendoli ad ogni suo piacimento
in tempi oportuni operare con effecto circa tutte quelle cose che sub brevita sarranno qui di sotto
notate et anchora in molte piu secondo le occurrentie de diversi casi et.

Ho modi de ponti leggerissimi et forti et atti ad portare facilissimamente et con quelli seguire
et alcuna volta fuggire li inimici et altri securi et offensibili da foco
et battaglie : facili et commodi da levare et ponere. Et modi de ardere et disfare quelli de linimico

So in la obsidione de una terra togliere via lacqua de fossi et fare infiniti ponti ghatti et scale
et altri instrumenti pertinenti ad dicta expeditione

Item se per altezza de argine o per fortezza de loco et di sito non si potesse in la obsidione de
una terra usare lofficio de le bombarde : ho modi di ruinare omni forte o altra fortezza
se gia non fusse fondata in su el sasso et.

Ho anchora modi de bombarde commodissime et facile ad portare . Et con quelle buttare minuti sassi
a similitudine quasi di tempesta : et con el fumo di quella dando grande spavento al inimico
con grave suo danno et confusione et.

Et quando accadesse essere in mare ho modi de molti instrumenti aptissimi da offendere et defendere
et navili che faranno resistentia al trarre de omni grossissima bombarda : et polvere et fumi

11.

"Also I can execute sculpture in marble, bronze and clay. Likewise in painting, I can do everything possible as well as any other"

How do we know what recruiters want, today, in 2023?

The job description makes their desires *clear*

We don't need to guess what they want to read about...

My definition of a good CV…

Put what the recruiter is looking for… where they're looking for it

Krishna Parabhiraman

(phone / email illegible)

1. Professional Experience

Reva Systems Mar 2004 – present

(location/title line illegible)

(paragraph describing Reva Systems, largely illegible)

Product Strategy and Management:

- Part of the core team. The team re-organizing and re-focusing the company - market sizing, go-to-market, competitive analysis, product positioning and execution plans.
- market requirements gathering and validation effort - including, running focus group sessions and questionnaires.
- product and requirement definition effort to support, resulting in the first version of the software application, native hardware product addressing the needs of the market.
- patent disclosures in support of the new strategic effort.

Solutions and Services:

- Drove new customer wins (via channels) in Europe and Middle East which were critical in sustaining the company in 2009/2010.
- Instrumental in acquiring and managing channel partners worldwide - training, "priming the pump".
- Instrumental in up selling, managing and most importantly closing projects - resulting in growth of services revenue.
- Managed the solutions development team - team was distributed between US and China.
- Drove engineering product requirements based on customer and partner engagements.

Technology:

- the algorithms in the Reva product. 5 issued patents.
- Implemented the RF control and management algorithms in the Reva product.
- of the standardization of Low-level Reader Protocol (LLRP) - a worldwide standard for reader interface protocol. This standard involved coordinating with and driving numbers from 80+ companies. effort was completed within a year which was a record time perspective. Honored with the GS1 Person of the Year award in recognition for that effort.
- chair of the Reader Protocol group in GS1/EPCGlobal.
- Co-led the massive technology demonstration of a new European ETSI Standard that led to the explosive growth of RFID in Europe. This also paved the way for acquiring Metro - one of Reva's largest customers.
- Instrumental in securing partnerships with the key technology vendors.

Skill   **+ Evidence**   **+ Quantification**

Communication skills have been developed by designing open questions in **two** user interaction surveys, to gain qualitative insights into GUI preferences

Coding skills have been developed by writing modular, secure and well-tested code in Python and React, for a project with upwards of **2,000** end users

The Harvard Competency Dictionary…

HARVARD HUMAN RESOURCES

Attention to Detail

Accomplishes tasks by considering all areas involved, no matter how small; shows concern for all aspects of the job; accurately checks processes and tasks; is watchful over a period of time.

Key Actions

- **Follows procedures** – Accurately and carefully follows established procedures for completing work tasks.

- **Ensures high-quality output** – Vigilantly watches over job processes, tasks, and work products to ensure freedom from errors, omissions, or defects.

- **Takes action** – Initiates action to correct quality problems or notifies others of quality issues as appropriate.
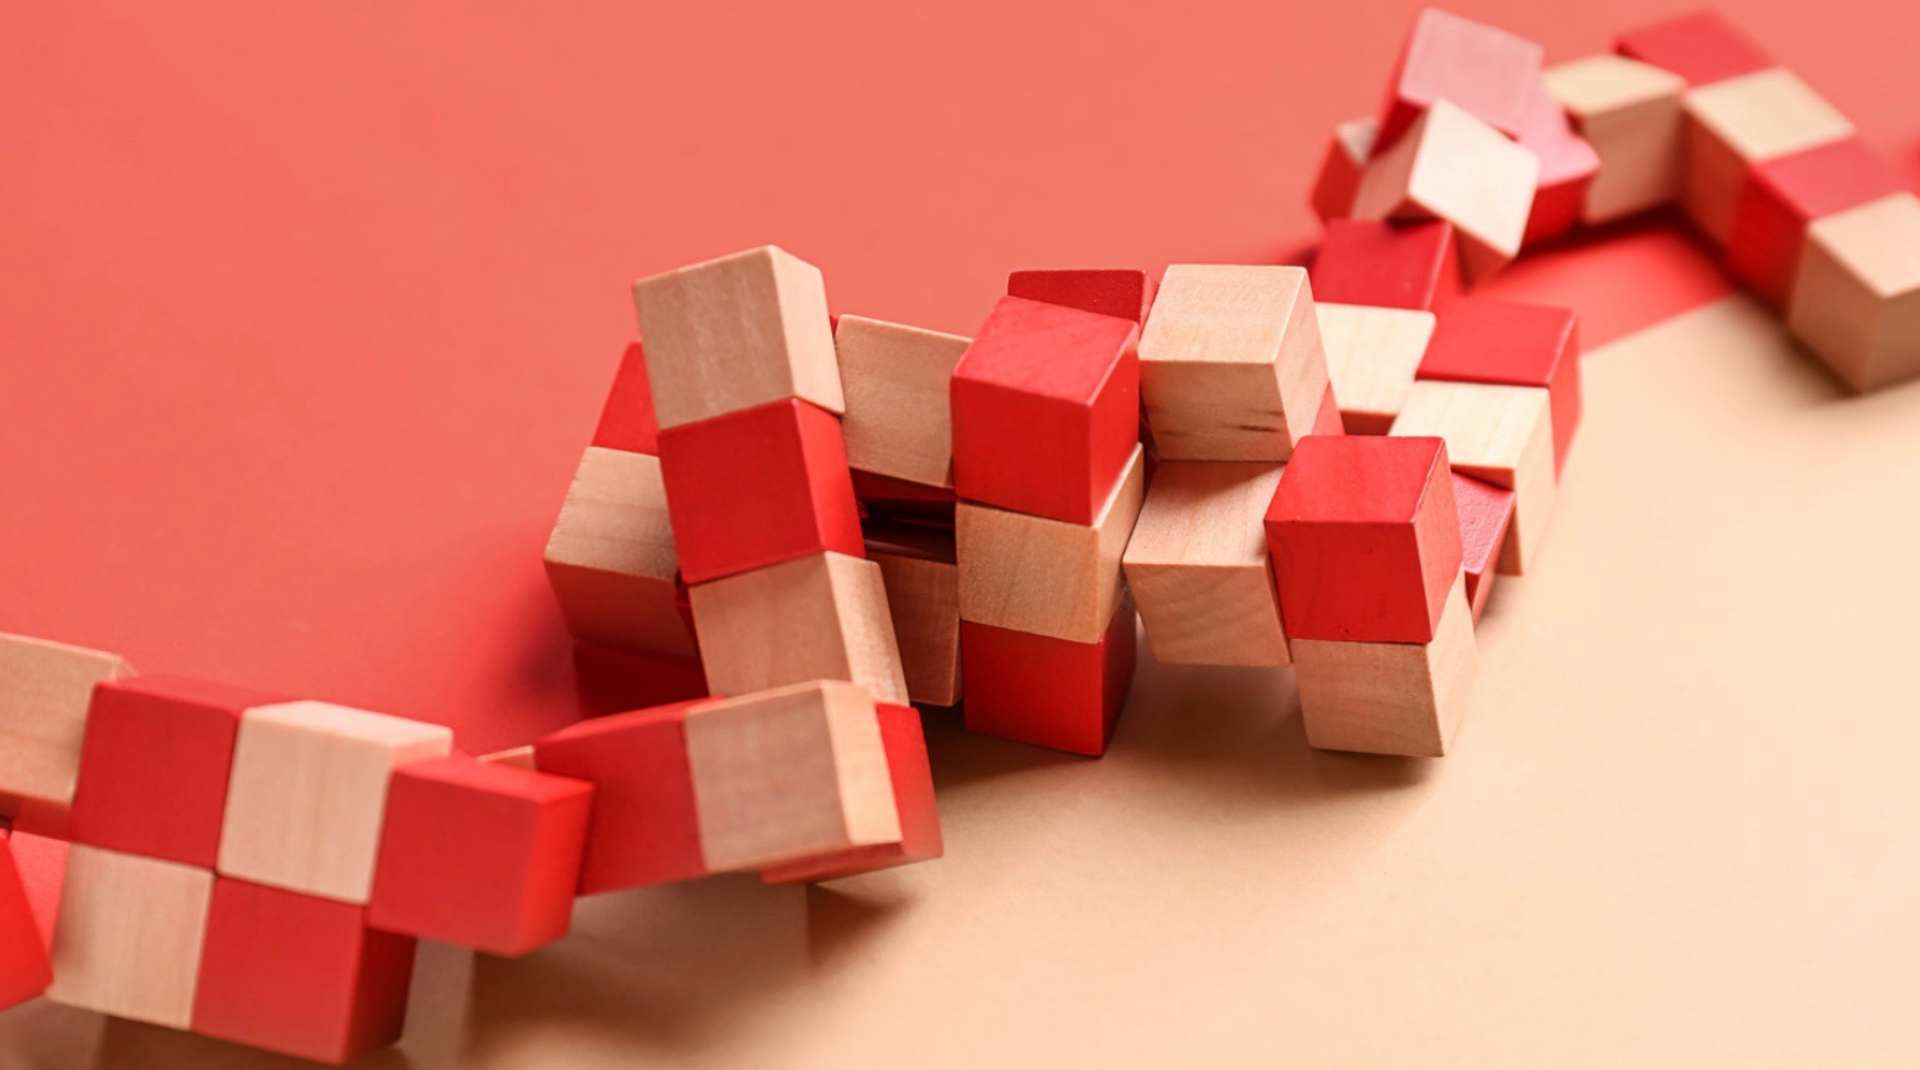

Time for an example...

Software Engineer, University Graduate, Android

🏢 **Google**   📍 **In-office:** London UK ⓘ

Minimum qualifications: 🔵

- Bachelor's degree in Computer Science, related technical field, or equivalent practical experience.
- Completed projects or classes focused on data structures and algorithms.
- Experience programming in C++ and/or Java.

Preferred qualifications: 🔵

- Master's degree in Computer Science or related technical field.
- Android application development experience in C++, Java, and/or Kotlin.
- Experience in web applications, mobile applications, and multi-tiered systems.
- Ability to select and implement an algorithm, using appropriate data structures to efficiently solve a problem; interpreting algorithms and contributing ideas to their development.
- Effective object-oriented skills.

Responsibilities ⌃

- Research, create, and develop software applications to extend and improve on Google's product offering.
- Contribute to a wide variety of projects across the full-stack.

It's over to you…
